REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

As per claims 1-6, 12-13, 15-17, prior art of record, taken alone and/or in combination with other does not teach and/or fairly suggest limitations of means for receiving a new communication module from the communication server and when a software agent receives the new communication module, the software agent communicates using the new communication module via a new communication means with another software agent from the software agents, thereby changing the communication means between the two software agents, in combination with other recited limitations. Furthermore, see the applicant's arguments pages 9-18.

As per claims 7-11, 14, 18, prior art of record, taken alone and/or in combination with other does not teach and/or fairly suggest limitations of correcting a breakdown in a communication means used between two software agents by having a server send communication modules to the software agents and communication modules being designed to give access to a different communication means, in combination with other recited limitations. Furthermore, see the applicant's arguments pages 9-18.

The rejection of claims 1-18 under 35 U.S.C. 101 is withdrawn in light of the amendments to claims 1 and 7. The limitation of 'implemented on at least one computer' in claim 1 and the limitation of 'implemented by at least one computer' in claim 7, removes ambiguity of whether the communication server is a software or a hardware. The communication modules are now claimed in conjunction with at least one computer, which brings the claims in accordance with proper format.
